

PLease stop this bill, we would like less corporate control so artists may flourish. In order to improve the economy through music, etc, a wide variety of programing is needed.....not things like clearchannel! How much more boring can the corporations make it!!!! I think that this is one (of many reasons) that many of us have stopped purchasing CD's, etcthe fun variety is gone.....it's all Brittany all the time!

This corporate control and greed is limiting the freedom of choice and variety. The USA did not become strong out of conformity....we crave variety, creativity, and even adventure.....the over-control of the media prevents this.
